

P92 RDI Flood Wall Think global act local

Cutting Edge Flood Prevention
Techniques in Disaster Management

- + cost efficient
- + cheap maintenance
- + flood wall is there only if needed

Easy to implement

Preparation

Discovery and mapping of the terrain and analyses of the riverbed

Identify the behaviour of the river

Identify the structure and composition of the soil and riverbank

Identify the most endangered places where to install the solution

Substructure building

Design the structure

Works on the riverbed

Works on the riverbank

Building of the fix parts

Mobile elements

Safety is first

High quality materials

Light elements which can be assembled easily

LIFE SPAN
MORE THAN

100 years

ORGANIZED ASSEMBLY
FOR A CITY

< 6 hours

REFERENCE IN EUROPE
MORE THAN

100 km

Made by various materials: steel, other rigid materials, or even transparent plastic
